*Our services are CONFIDENTIAL*
In 1999, Vanderbilt began a specialized Faculty and Physician Wellness Program (FPWP) established to meet the growing needs of professionals coping with stress, depression, addiction and other emotional and behavioral issues.

The FPWP is available to provide psychological support to the Vanderbilt faculty of all eleven University Schools as well as housestaff, spouses and domestic partners.

The FPWP of the Work/Life Connections-EAP operates under the direction of an occupational medicine physician and a psychiatrist, both university faculty members. Each client works with a counselor and psychiatrist.

Confidentiality is critical in the success of the counseling relationship. Information concerning your use of Work/Life Connections-EAP are not in any University medical or personnel record.

Call Work/Life Connections-EAP for a CONFIDENTIAL assessment, brief counseling and referral services provided as a Vanderbilt benefit at no additional cost to you.
